SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on SR 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.
- Pfeiffer Big Sur State Park reopened to the public on 07/01/17.
- Julia Pfeiffer Burns State Park, Andrew Molera State Park, and Highway 1 at Pfeiffer Canyon Bridge remain closed.
- Effective 07/01/17, there is a shuttle available until the Pfeiffer Canyon Bridge reopens.

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- Remains fully closed in both directions at Mud Creek due to continued slide activity. Delivery vehicles and local residents will need to use Nacimiento-Fergusson to exit south or to clear the access times at Paul's Slide. Local residents and delivery vehicles only; the only access to the public is accessing on Highway 1, using Nacimiento-Fergusson, will be to Gorda (PM 10) to the south, and to Limekiln State Park (PM 20.76) to the north.
- Estimated opening date is 06/01/18.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** Pockets of low afternoon RH and gusty SW winds again today east of the Cascade/Sierra crest, but conditions just below High Risk designation ***

The cooling effects of a low pressure trough along the West Coast will linger through Thursday with temperatures right around seasonal values. For the warmest inland areas, that means afternoon highs around 100. Friday the trough will weaken and warmer weather under higher pressure will move into the region. Afternoon highs will return to around 105 for the warmest inland areas through the weekend. Later Saturday a weak low pressure system seems likely to be just off the Northern California coast that will move inland Sunday through Tuesday. While no thunderstorms are expected over the Northern Region through Saturday, and the effects of the low on possible thunderstorm generation remain unclear at this time, there appears to be a chance for isolated activity over the far northern areas Sunday night through Monday evening. Confidence in that course of events is rather low, however.

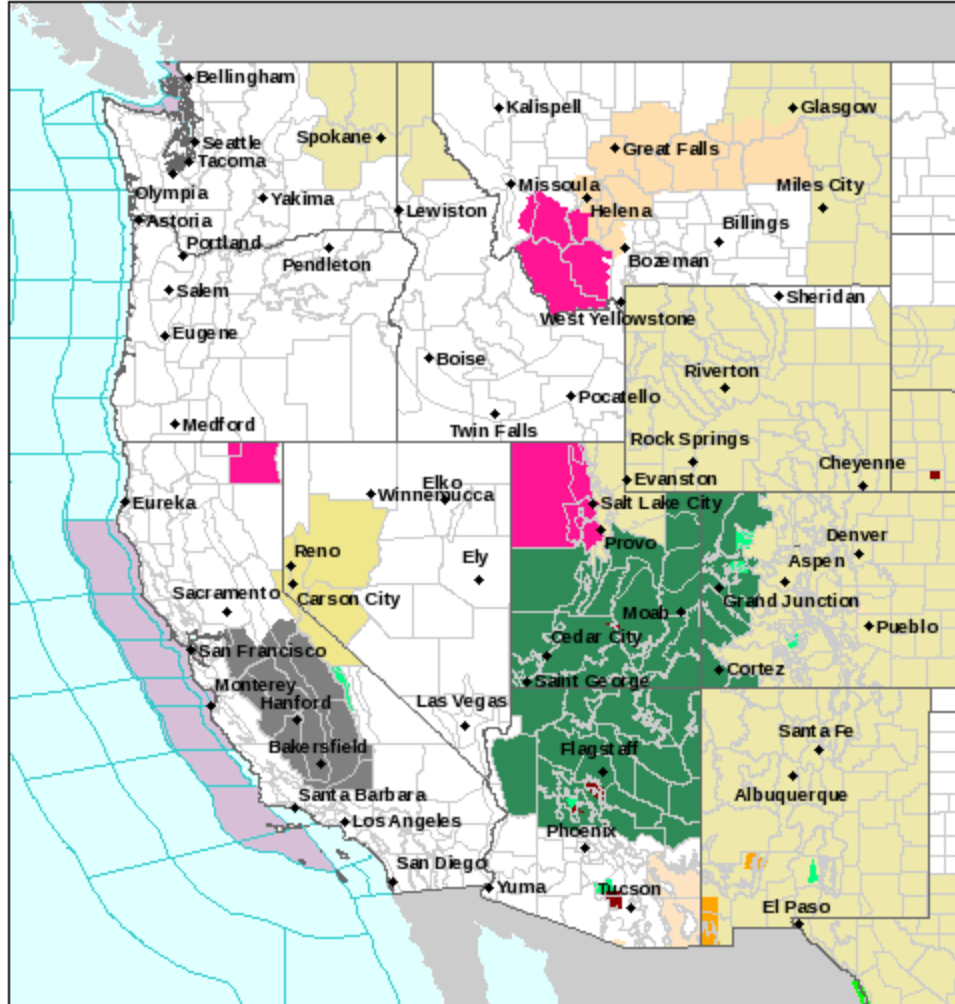

There will continue to be areas of low afternoon RH (10-15%) and gusty SW winds with peak gust speeds 25-33 mph east of the Cascade/Sierra crest today, but wind speeds will be lighter after today through the weekend. Depth of the marine layer will remain somewhat variable, but a very dry air mass will persist above it and be particularly noticeable in the Bay Area. Overnight RH recovery will generally be seasonably moderate across the region.

SOUTHERN CALIFORNIA

An area of scattered thunderstorms continued overnight across much of the deserts from areas near I-40 toward the Arizona border southwestward into the Coachella and Imperial Valleys. These storms are expected to slowly dissipate later this morning, but a few wet thunderstorms may reach the desert side of the San Jacinto Mountains and the Cleveland N.F. in San Diego County. There will be a lull in convection during the early afternoon hours, but isolated thunderstorms may develop toward evening across these same areas as well as the Angeles N.F. eastward in the San Bernardino Mountains. Despite the monsoonal moisture over Southern California, the central part of the state remains quite dry. Minimum RH readings will likely drop into the teens again this afternoon across interior valleys of the central coast region and the Sierra Foothills. High temperatures through Friday will remain slightly above normal with readings in the lower 90s in the valleys to around 100 in the San Joaquin Valley. Northwest winds of 15-25 mph will be possible along the central coast Thursday afternoon due to an increase in onshore flow gradients. Friday into the weekend, isolated storm coverage, at best, is expected over the far eastern deserts. The rest of the area should be mostly sunny with temperatures 5-8 degrees above normal through the weekend. Another surge of monsoonal moisture may arrive next Tuesday or Wednesday.

EMAC and Public Assistance - 2017 Winter Storms

- Cal OES Recovery Division identified the need for Public Assistance subject matter experts to assist with the aftermath of the 2017 Severe Winter Storms. Accordingly, Cal OES requested assistance from other states through the Emergency Management Assistance Compact (EMAC) - the Nation's mutual-aid system. New Jersey and Colorado provided personnel that arrived on Monday, 06/13/17. Both states along with other potential states will be providing support between now and the beginning of September at various Joint Field Offices throughout California. The goal is to assist those impacted counties in identifying disaster related damage and program eligibility.
